

Box plot showing the number of reads mapped to the reference genome for five tools: EsVirtu, Centrifuger, Kraken2, Metabuli, and Sylph. The y-axis represents the number of reads, ranging from 0 to 1,000,000,000. EsVirtu, Centrifuger, and Sylph show very low read counts, while Kraken2 and Metabuli show significantly higher counts. Metabuli has the highest median and the largest spread of data, including several outliers.

| Tool        | Median       | Q1           | Q3           | Min          | Max          | Outliers                                                             |
|-------------|--------------|--------------|--------------|--------------|--------------|----------------------------------------------------------------------|
| EsVirtu     | ~10,000,000  | ~10,000,000  | ~10,000,000  | ~10,000,000  | ~10,000,000  | None                                                                 |
| Centrifuger | ~10,000,000  | ~10,000,000  | ~10,000,000  | ~10,000,000  | ~10,000,000  | None                                                                 |
| Kraken2     | ~100,000,000 | ~50,000,000  | ~150,000,000 | ~50,000,000  | ~150,000,000 | ~500,000,000                                                         |
| Metabuli    | ~500,000,000 | ~100,000,000 | ~900,000,000 | ~100,000,000 | ~900,000,000 | ~100,000,000, ~200,000,000, ~400,000,000, ~800,000,000, ~900,000,000 |
| Sylph       | ~10,000,000  | ~10,000,000  | ~10,000,000  | ~10,000,000  | ~10,000,000  | None                                                                 |
